The primary benchmark for the Julex Limited Duration High Income Strategy is Vanguard Short-term Bond ETF (BSV), which tracks a market-weighted index of US-government bonds, investment-grade corporate and investment-grade international dollar-denominated bonds with maturities of 1-5 years. The secondary benchmark is the iShares US Core Bond Aggregate Index (AGG), which tracks an index of US investment-grade bonds. This market-weighted index includes Treasuries, agencies, CMBS, ABS and investment-grade corporates.

The Limited Duration High Income strategy performance above is a live record of the Julex composite. The returns on a client account may be different due to the timing of trading and transaction costs. Performance is historical and does not guarantee future results. Account level performance may be higher or lower than the Composites. Total returns are shown gross and net of the higher of a 50bp or average composite account(s) advisory fee. Returns include the reinvestment of dividends and capital gains. A GIPS report is available upon request through the contact information below.
